PROFESSIONAL SUMMARY

MEP Engineer specializing in HVAC, Ventilation, and Firefighting systems, with hands-on experience in procurement, site execution, and technical office work. Experienced in managing full MEP systems including VRV/VRF, DX AHU, CRAC, Package Units, exhaust & fresh air ventilation, smoke control, FM200, and manual/automatic firefighting. Skilled in first-fix power cabling, BMS cabling, steel conduits, trays, trunking, and ductwork execution. Combines strong technical expertise in automation and PLC/SCADA systems.

EXPERIENCE

Arab Contractors – Electromechanical Engineer

Sept 2025 – Present

Monorail Project – Site & Technical Office Engineer:

HVAC & Ventilation Systems:

- Supervised and executed installation of VRV, CRAC, DX AHU, and Package Unit systems.
- Oversaw exhaust, fresh air, and smoke ventilation systems across monorail stations.
- Performed quantity surveying and BOQ preparation for HVAC works.

Firefighting Systems:

- Supervised installation and handover of FM200 fire suppression systems at Stations 1, 3, 4, 6 & 9
- Oversaw manual and automatic firefighting systems installation and commissioning.

First-Fix & Electrical Works:

- Executed first-fix power cabling for all HVAC, ventilation, and firefighting systems.
- Supervised BMS first-fix cabling across stations.
- Oversaw installation of steel conduits, cable trays, trunking, and flexible conduits.

Ductwork & Piping:

- Supervised ductwork (sheet metal) fabrication and installation.
- Oversaw copper pipework and water-related MEP works.
- sites.

Procurement Phase :

- Raised purchase orders for pressurization fans used in smoke control/escape systems.
- Procured black sheet metal (ductwork), exhaust fans, and other MEP materials.
- Managed tenders and quotations for over 8 MEP project files.

SIAC – Automation Engineer

Mar 2025 – May 2025

- Installed and tested PLC panels for sewage pump systems.
- Integrated sensors and control panels at El-Manshiy Station.
- Conducted field inspections at multiple water and wastewater

EDUCATION

Bachelor's Degree in Mechatronics, Robotics & Automation Engineering

Mansoura University | Graduated: January 2025

COURSES

- **Mechanical Design Course** – with Eng. Islam Ibrahim | November 2025 – May 2026
- **Beit El-Mohandeseen Course** | February – April 2025
- **PLC Advanced Course** | September 2024

SKILLS

HVAC & Ventilation: VRV/VRF, DX AHU, CRAC, Package Units, Exhaust & Fresh Air Systems, Smoke Control, Pressurization Fans, Ducting & Sheet Metal

Firefighting: FM200 Suppression, Manual & Automatic Systems, System Commissioning & Handover

Electrical & First-Fix: Power Cabling, BMS Cabling, Steel Conduits, Cable Trays, Trunking, Flexible Conduits

Site & Technical Office: Site Supervision, Quantity Surveying, BOQ Preparation, Procurement & Tendering, Handover Documentation

Automation & Control: PLC (Siemens, Mitsubishi, LS), SCADA, WinCC, TIA Portal, Ladder Logic, PID Control, Sensor Calibration

Software: AutoCAD (MEP & Electrical), SolidWorks, MATLAB, Python, Factory I/O, LogixPro, CADE SIMU

LANGUAGES

Arabic: Native **English:** Proficient

KEY PROJECTS

- **Monorail Stations (Arab Contractors): Full MEP supervision including VRV HVAC, smoke & fresh air ventilation, FM200 firefighting, first-fix power & BMS cabling across Stations 3, 4 ,6 & 9.**
- **Pump Control Systems (SIAC):** Installed and commissioned PLC panels for sewage pump stations with full sensor integration.
- **Water Monitoring via SCADA:** Designed real-time monitoring system using Siemens PLC and SCADA for water quality and flow.
- **Smart Fire Suppression Prototype:** Arduino-based fire detection and suppression control system.

TRAINING

- **Intern – Water Stations, Kom El Nour & Mit Ghamr | Jul – Aug 2024** – Supported PLC and SCADA-based automation tasks; calibrated sensors and automated valve control systems.
- **Intern – Electromechanical, Arab Contractors | Jul – Aug 2023** – Participated in the installation of fire fighting, and medical gas systems during the construction of medical facilities, assisting with piping installation, equipment setup, and site inspections.
- **Intern – AI & Automation, Digital Training Center (DTC), Mansoura University | Sep 2022 – Sep 2023** – Participated in AI training and chatbot development workshops.
